

SECRET

27 August 1985

NOTE FOR:

SUBJECT: John McMahon's Upcoming Speech on CIA Accomplishments of the  
Past Year

John might be interested in including some of the following:

1. The number of coordinated National Estimates continues to grow: 80 were completed in 1984; in 1985 the figure will be a little over 100.
2. An increasing proportion of these are fast-track Estimates which deal with specific items directly related to on-going policy questions.
3. There has been considerable payoff from the establishment of two new NIO accounts: Counterterrorism and Foreign Denial and Intelligence Activities. And additional payoff will come from the just-established additional NIO account: Nuclear and Chemical Proliferation.

  
Herbert E. Meyer  
Vice Chairman, NIC
